## JAMB CHANNEL

*Ideal For Wardrobe Openings*

This aluminium jamb channel has been developed to compliment the popular Robemaker wardrobe door system. The channel fits perfectly over the existing Robemaker extrusions and has matching aesthetics - a ribbed face on one side and a smooth plain face on the other. It is available as a packed set of 2 jambs @ 2470mm long and is available in both White Birch and Gloss White. Packs come with fixing screws, screw caps and installation instructions.

As well as the Robemaker system, this jamb channel is suitable for use with most bi-passing door track systems.
