Use a minimum of 4 clips per frame from 160mm to 400mm wide plus an extra clip for support every 300mm at bottom and 900mm at top to prevent bowing. If frame is tall and narrow use wall fixing clips in the vertical plane to prevent bowing. (Vertical clips are recommended for frames 1500mm high to 2400mm high). Maximum recommended height is **2.4m**. Maximum recommended size per frame is **2.5sq m**.
